

Education is the process of equipping young people to take responsibility for all aspects of their own life .

Peer Mentoring Support Programme

What is it ?

A programme of 5 two hour sessions for older students to equip them to effectively perform the role of peer mentor for younger students enabling both groups to become more self confident, motivated independent learners

What does it cover ?

There are 5 areas of content, each designed to cover a separate aspect of the role of a mentor. These 5 aspects are :

- Promoting self awareness, self esteem and motivation
- Supporting raised aspirations through effective goal setting
- Personal organisation
- Specific Learn to Learn skills
- Generic thinking skills

How would the sessions be presented ?

The style is very much focussed on applying the latest knowledge of brain friendly learning techniques, using humour, visuals, practical application and linking the learning to real life situations. The documentation will include a clear structure for the formation of a peer mentoring policy and curriculum to ensure that the learning becomes embedded in the school in a sustainable way.

What will it cost ?

The core programme is aimed at groups of between 20 and 30 students, although two groups could be covered on the same day. The cost for the full programme, including both groups and all resources and documentation, tailored for the specific needs of an individual school would be £2,500. By arrangement this could include working with a group of staff in shorter twilight sessions.
